What Is **Property**?

Property is a term describing anything that a person or a business has legal title over, affording owners certain enforceable rights over said items.

Examples of property, which may be tangible or intangible, include automotive vehicles, industrial equipment, furniture, and real estate—the last of which is often referred to as "real property."

" Most properties hold current or potential monetary value and are therefore considered to be assets. But properties can simultaneously be liabilities in some situations. Case in point: if a customer sustains an injury on a company's property, the business owner may be legally responsible for paying the injured party's medical bills.

KEY TAKEAWAYS

- ☐ *Property is any item that a person or a business has legal title over.*
- ☐ *Property can be tangible items, such as houses, cars, or appliances, or it can refer to intangible items that carry the promise of future worth, such as stock and bond certificates.*
- ☐ *Intellectual property refers to ideas such as logo designs and patents.*
- ☐ *Property owners may also have liabilities, which is the case if a business owner is on the hook for medical expenses resulting from a customer incurring an injury on his company's grounds.*
